Byron Risdon, ASID, owner of Byron Risdon LLC, based in Washington D.C. and member of BADG

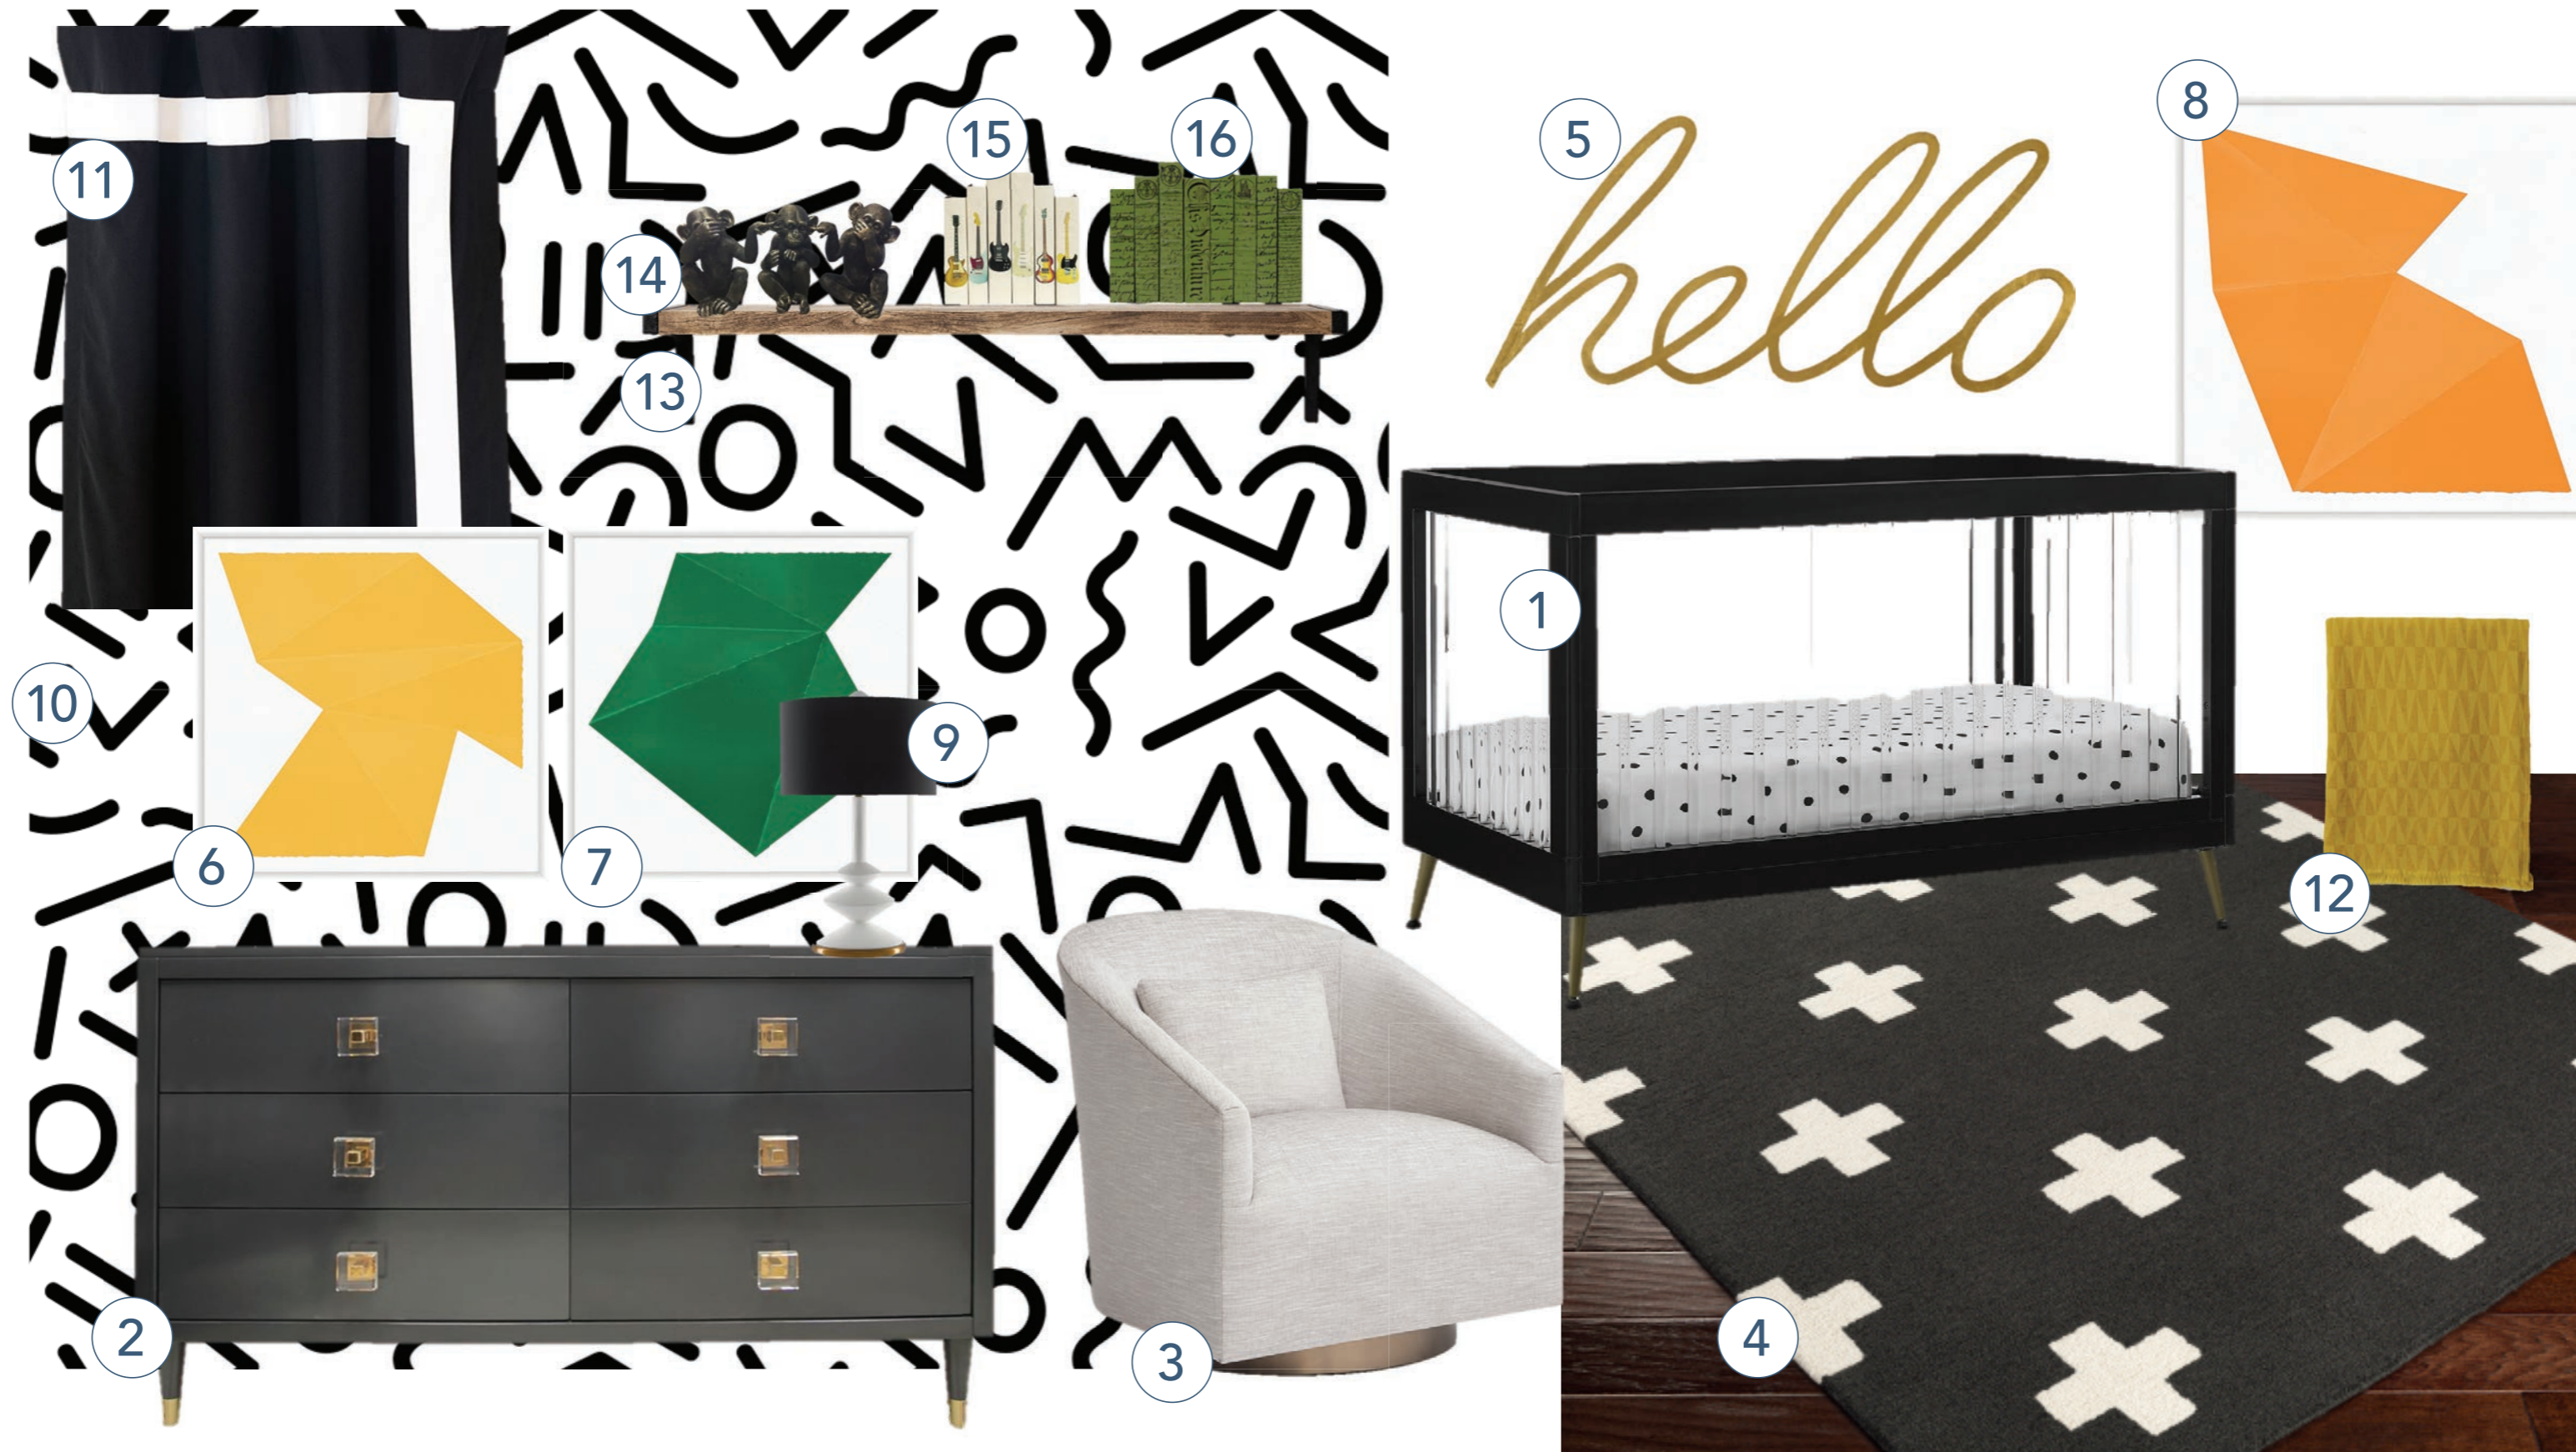

Why is diversity in design an issue that the industry needs to embrace?

Diversity in the design industry needs to be embraced because it's made up of all types of people with varying perspectives and sensibilities. As creatives we have the ability to see things in a way others don't and no two visions are the same.

How do you incorporate your own background, history and heritage into your own design work?

As a designer I incorporate my experiences and knowledge as an industry professional. The spaces I create are reflective of my clients wants and needs in collaboration with my personal aesthetic and abilities.
